

2022 Legislative Supplemental Budget Comparison — March 9, 2022

In the evening of Tuesday, March 8, the Washington State House and Senate released their final legislative supplemental budget for the remainder of the 2021-2023 biennium. The final budget represents the compromise reached by both chambers. The chart below highlights WSHA’s budget priorities, as well as other items of interest to hospitals and health systems, and compares the final budget to what was initially proposed in each chamber’s budget on Feb. 21.

The charts below list state funds and total funds, which includes a sum of state funds and other funds, such as federal funds or funds derived from fees or local intergovernmental transfers. We have indicated WSHA’s position on the budget line items.

Our top budget priorities for this supplemental budget include:

- **Health care workforce**—investing in nursing education and pipeline development
- **Difficult to discharge** – investing in the long-term care system to ensure patients who are ready to discharge have an appropriate place to receive long-term services and supports during the pandemic and beyond
- **Behavioral health** – improving the behavioral health system of care across the continuum
- **Washington Medical Coordinating Center** – sustaining the WMCC through the biennium, so it is ready to level-load patients across the state during an emergency, such as another COVID-19 surge
