of Hospitals and Health Systems

Washington State
Hospital Association

Northwest Safety and Quality Partnership *CNO and Quality Leader Learning Collaborative*

March 30, 8:00am – 10:00am

Virtual Meeting

https://wsha-org.zoom.us/meeting/register/tJercuCprTojGtXEfNqhEtiw_GTEQaXijfAz

Objectives:

- Understand how to use data visualization concepts to improve clinical effectiveness.
- Hear examples of how hospital leaders are using innovative data concepts to guide their work.
- Hear how hospitals have used data to lead beyond silos and lead by influence.
- Learn how to bring together multidisciplinary teams through the innovative use of data to tackle shared quality improvement priorities.

8:00 a.m. Welcome, housekeeping and program updates

Holly Nickerson
Asante

8:10 a.m. Data Through Value-Stream Management

Karin Larson-Pollock & Linda Severs
Providence Regional Medical Center Everett

Understand how to use data to become a high reliability organization, pulling multidisciplinary teams together into Value Streams to help team members across the patient care continuum understand the constraints and impacts from one another. Learn how to use data to lead beyond silos and lead by influence.

8:50 a.m. Use of Data to Support Clinical Effectiveness Program

Darren Migita
Seattle Children's

Hear how Seattle Children's used Lean concepts to map data in the EHR and follow data sets over time to better understand clinical pathways and improve efficiency of processes. Learn how they used data visualization to inform this project.

9:30 a.m. Q&A and Discussion

All, Small Groups

9:50 a.m. Program Updates, Closing and Adjourn
