

WSHA Safe Deliveries Roadmap: Data Submission Quick Reference Sheet

Obstetrics Measures Categories and Data Submission Information				
Measure Type	Submission Frequency	Submission Due Date	System for Data Submission	Measure Titles
Safe Deliveries Roadmap and OB Outcome Measures	Monthly	60 days after end of month	MDC or QBS	*Early elective delivery at 37 0/7 to 38 6/7 weeks gestational age
				*NTSV C-section
				Primary TSV C-section
				C-sections for nulliparous full term inductions
				C-sections for multiparous full term inductions
				Maternal ICU admission rate
				Maternal blood transfusion rate
				Operative vaginal delivery rate per vaginal deliveries
				Unexpected newborn complications rate (total, severe, moderate)
				Women with preeclampsia - ICU admission rate
				Chorioamnionitis in mother and/or newborn affected by chorioamnionitis per inborn newborns (2 subgroups: per newborns of primary TSV deliveries and newborns of non-primary TSV deliveries) <i>(NEW)</i>
				Shoulder dystocia with newborn birth injury (brachial plexus or other injuries, hypoxia, asphyxia, 5-min APGAR < 7, neonatal death) in term newborns (>= 37 wks GA or BW >= 2000g) <i>(NEW)</i>
Safe Deliveries Roadmap Labor Management Process Measures	Monthly	60 days after end of month	OBCOAP or MDC	Delay admission to >= 4 cm - spontaneous labor - percent guidelines met
				First stage < 6 cm - Spontaneous Labor C-section - Percent Guidelines met
				First stage < 6 cm induced labor C-section - percent guidelines met
				First stage >= 6 cm percent guidelines met
				Second stage C-section - percent guidelines met
				*Non-medically indicated induction of labor for nulliparous women 39-40 weeks gestation with unfavorable cervix
OB/Perinatal Measures from CHARS	Active data submission by hospital not required	Active data submission by hospital not required	Active data submission by hospital not required	Episiotomy rate for vaginal deliveries without instrument
				PSI 18 - OB trauma (3rd and 4th degree laceration for vaginal delivery with instrument)
				PSI 19 - OB trauma (3rd and 4th degree laceration for vaginal delivery without instrument)
				Severe Maternal Morbidity per all deliveries <i>(NEW outcome measure)</i>
				Severe Maternal Morbidity among delivering women with a diagnosis of preeclampsia <i>(NEW outcome measure)</i>
				Severe Maternal Morbidity among delivering women with a diagnosis of hemorrhage <i>(NEW outcome measure)</i>

= Medicaid Quality Incentive (MQI) measure - data submission due 75 days after the end of the month, not 60 days.
