Opioid Liquid and Syrup Conversion Assumptions:

Solutions are given orally which lowers the dose efficacy (e.g. 30mg PO = 10mg IV)

1 dose = 5 MEDS = 1 vicodin 5mg tablet

Morphine 10MG PO = 10 MED

Oxycodone 5 mg PO = 7.5 MED (thus 3.65 is equivalent)

Hydrocodone 5MG PO = 5 MED

Hydromorphone 1mg PO = 4 MED (thus 1.25 is equivalent)

Codein 35MG PO = 5 MED

Meperidine 100mg PO = 10 MED
