

## **SCCA Sponsors Patient, Physician and Nurse Symposiums**

Seattle Cancer Care Alliance (SCCA) provides an ongoing program of educational symposiums, targeted to specific types of cancer that feature treatment modalities, advancements and diagnostic techniques. SCCA will sponsor or host three events in September covering the latest information about immunotherapy, breast cancer and melanoma.

### **September 5-6, 2019**

***Best of Breast in the Pacific Northwest: Breast Cancer Symposium 2019 – For physicians  
Bell Harbor International Conference Center***

Two-day symposium designed for primary care providers that will cover multidisciplinary advances in breast cancer screening, diagnosis, treatment and survivorship care. Conversations will be driven by academic, physician and research specialists from SCCA, UW Medicine, Fred Hutch and more. Download the [symposium brochure](#) and [learn more](#).

### **September 7, 2019**

***12th Annual Northwest Melanoma Symposium - For patients and their loved ones  
Pelton Auditorium on the shared SCCA and Fred Hutch Campus***

SCCA and the Melanoma Research Foundation are co-sponsoring a symposium that will cover scientific advances to treat melanoma, and patient stories, including one from special guest, Seattle Mayor Jenny Durkan. Mayor Durkan will share details from her personal journey as a melanoma cancer survivor. Click [here](#) to register, or call (800) 673-1290.

### **September 19-20, 2019**

***Second Annual Cellular Immunotherapy Symposium – For Nurses, advance practice providers,  
community oncologists, pharmacists and oncology professionals***

***Washington State Convention Center***

Two-day symposium to present the ever-expanding and changing practice of immunotherapy, including clinical management of checkpoint inhibitors, adoptive cell transfer (CAR T-cell), and immunotherapy treatments. Click [here](#) to register. Special pricing is available for SCCA, Fred Hutch, Seattle Children's, UW and Network Members.
