

OPIOID HARM PREVENTION PEER FORUM SERIES 2026

About the Series

Across Washington, hospital teams are working every day to reduce opioid-related harm and strengthen patient-centered care. This year, WSHA is honored to launch the 2026 Opioid Harm Prevention Peer Forum Series—a statewide learning community built by hospitals, for hospitals.

This series reflects the feedback we received from hospital leaders about the areas they most want support, including:

- *Opportunities to learn directly from peers*
- *Practical tools for screening, training, shared decision making, and MOUD prescribing, including long-acting injectable buprenorphine*
- *Strategies for community resource linkage to ongoing care*
- *Support for pediatric pain management and reducing variation*
- *Tools to leverage MME/24 hour for ongoing improvement*
- *Guidance for caring for pregnant persons and adolescents with OUD*

2026 Quarterly Webinar Schedule

Q1: Monday, March 16 | 12:00–13:00

Screening, Training & Shared Decision-Making Models

Q2: Monday, June 15 | 12:00–13:00
