## New Psychiatry and Addictions Case Conference Series via Telehealth!

The UW Psychiatry and Addictions Case Consultation series (UW PACC) is a new CME-accredited program designed to expand the mental health and addictions care capacity of health care professionals in remote, underserved areas of Washington.

Modeled after the University of New Mexico's Project ECHO (Extension for Community Healthcare Outcomes), UW PACC will offer telehealth resource support to build the confidence and skills of providers who care for patients with mental, addictions, and behavioral health conditions. The new series is appropriate for primary care providers, mental health or addictions providers, and psychiatrists willing to engage in a proven model of distance learning.

Using interactive video, UW PACC will offer weekly online clinics, including a short educational presentation, followed by real-time in-depth clinical case consultation between community providers and UW psychiatrists and addictions experts.

The goal of UW PACC is to develop a regional peer learning and support network for treating mental health and addictions that will ultimately result in better patient care.

**For more information or to reserve your space, please email [uwpacc@uw.edu](mailto:uwpacc@uw.edu).**

\*New attendees welcome at any time – weekly attendance not required

\*\*Please see back of flyer for CME information.

UW Medicine

UW SCHOOL  
OF MEDICINE

\*CME Accreditation

\*\*\*\*\*

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The University of Washington School of Medicine designates this live activity for a maximum of **73.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity. (Each session is 1.5 credits)

**OBJECTIVES:**

***Upon completion of this activity, attendees should be able to:***

OBJECTIVES: Upon completion of this activity, participants will know, recognize, apply, reflect on, and appreciate:

1. How to screen and diagnosis psychiatric and addiction disorders in primary care settings
2. Differences between common presentations in primary care and in a typical psychiatry practice
3. The use of evidence-based pharmacotherapies to treat psychiatric and addiction disorders in primary care settings
4. Develop a therapeutic approach to working with patients with complex and difficult symptoms
5. Using tools for monitoring response to treatment
6. Review current therapeutic approaches for relapse prevention in addiction treatment
7. Key strategies for effective communication

\*\*Nominal fee will be charged for those who wish to obtain CME credit.
